## Texas Well Owner Network

Plum Creek Watershed

The Texas Well Owner Network (TWON) program is a free, one-day educational training for residents who want to become familiar with groundwater resources, septic system maintenance, well maintenance, water quality and water treatment. Private well owners are independently responsible for operating their wells and monitoring the quality of their water. The training will primarily focus on water quality issues in the Plum Creek Watershed as well as efforts by the Plum Creek Watershed Partnership, Texas Water Resources Institute and the Texas State Soil and Water Conservation Board to improve water resources in the area.

### Bring your well water samples:

Well owners may bring a water sample to the training to be screened for nitrate, total dissolved solids (TDS) and arsenic. For \$10, Guadalupe-Blanco River Authority (GBRA) Regional Laboratory will test for *E. coli* bacteria in a separate container. Pick up approved sample bags and containers with instructions at the GBRA lab in Seguin, or at the Caldwell and Hays County Extension offices. Bring samples and payment of \$10 to the training.

Pre-register for the workshop:
